PERMIT APPLICATIONS (Categories 1-5 below) – Determine the category below for each application being submitted. If a single application has two or more types of units, only the higher (or just one set) fees apply for that application. One example could be storage and treatment Part A and B applications. Use only the Storage fees below by checking the correct boxes in line #1 for storage Part A and Part B and writing in the correct fees in the next column. Another example, for both Storage and Disposal, the higher Disposal fee(s) in line #3 would apply. For facilities which include Corrective Action and another activity such as Storage or Treatment, the Storage or Treatment applies.
